Every Footstep Counts - WHS Code of Respect

1. Start and finish your walk along the Wall at different places or follow a circular route. This way there will be half as much wear on the path next to the Wall.

2. Hadrian’s Wall World Heritage Site

5. Never climb up or walk on top of Hadrian’s Wall.

6. During the wet winter months the ground is waterlogged and this is when the risk of damage to the monument is greatest. Instead you could walk one of the alternative trails, being developed close by.

10. Always keep your dog under close control.
